RE: Award Number SM15005

Dear Ms. Nunez

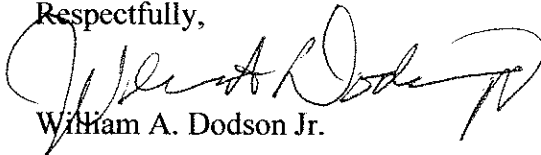

I am writing to offer our support to CMAA Refugee Services and their work with the community at Capital Park. We have worked with CMAA, supporting their work with the Capital Park community, since 1997.

This Sewing project is worthy of much support. As neighbors to Capital Park, we have supported resident training and self-help classes. We previously coordinated a voluntary sewing class with the Somali residents. We also supported the development of a residents' council and training people in leadership skills as a very important step toward a long-term solution to the culture of violence at Capital Park.

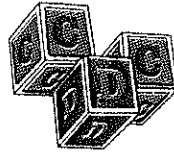

We work closely with the community on a number of projects. We have previously provided a space for a community garden and free access to water. We also provide free space for large community meetings and provided expertise in guiding CMAA in some of these community issues.

Please call if you have questions.

Respectfully,

William A. Dodson Jr.

Ms. Nunez:

We are happy to support the work of CMAA Refugee Services at Capital Park. We have collaborated with this group on many projects.

CMAA Refugee Services at Capital Park and CDCFC have enjoyed a professional relationship for several years. We have created a partnership that provides financial literacy workshops and other services to families in the Capital Park Community. Our primary goals are to teach families how to be smart about money matters, to become homeowners and ultimately to become self-sufficient.

In Working with CMAA Refugee Services I have encountered many things that add value to the Capital Park Community; however, none of them are more valuable than what I have seen CMAA add by empowering families to become informed, educated consumers and responsible, productive citizens.

I enthusiastically support the work of CMAA Refugee Services at Capital Park in their pursuit of this grant.

Sincerely,

Annie Bailey
Manager, Family Enrichment
